CAREER OBJECTIVE

Information Science Engineering graduate with knowledge of digital experience platforms, data analytics, and web technologies. Experienced in working with data, exploring platform capabilities, and developing technical solutions. Familiar with software development concepts, REST APIs, and data-driven applications. Strong analytical and problem-solving abilities, with a focus on continuous learning and delivering quality solutions.

TECHNICAL SKILLS

- **Adobe Experience Cloud:** Adobe Experience Manager (AEM), Adobe Experience Platform (AEP), Customer Journey Analytics (CJA), XDM, Schemas, Datasets, Data Ingestion, Data Mapping, Identity, Audiences, Segmentation, Data Views, Dimensions, Metrics, Classifications
- **Programming & Web:** Java, C, HTML, CSS, JavaScript, React
- **Frameworks:** Spring Boot, Hibernate
- **Data & Analytics:** MySQL, Customer Data Analysis, Audience Analysis, Customer Journey Analysis, Data Visualization
- **Generative AI:** Prompt Engineering, RAG
- **Tools & Concepts:** REST APIs, VSCode, Postman

TECHNICAL EXPERIENCE

Java Backend Development

- Developed a backend application using Java and Spring Boot, following object-oriented programming and layered application architecture.
- Used Hibernate/JPA for ORM and database operations, integrating PostgreSQL for persistent data storage.
- Implemented REST APIs to support application operations and communication between application layers.
- Practiced entity modelling, repository operations, CRUD functionality, and database integration.

Adobe Experience Cloud — Hands-on Experience

Adobe Experience Manager (AEM)

- Developed reusable components, including header, footer, hero, carousel, teaser, and text components.
- Worked with component dialogs, editable templates, Experience Fragments, and client libraries for styling.
- Practiced Sling Models and OSGi services to support component functionality, and used Maven and CRXDE Lite for project development and configuration.

Adobe Experience Platform (AEP)

- Created XDM schemas, field groups, datasets, and custom fields; practised event-data ingestion and field mapping.
- Configured identity namespaces and primary identities, and explored customer profiles and Identity Service.
- Built audiences using segmentation rules and practiced audience activation to configured destinations.
- Used AEP Query Service to query and analyse customer experience data.

Customer Journey Analytics (CJA)

- Analyzed customer journey data in CJA Workspace using Freeform Tables, filters, and segments.
- Practiced audience and segment analysis using logical conditions, nested containers, and time-based restrictions.
- Created data connections and data views using AEP datasets, configuring dimensions and metrics.

EDUCATION

- **Dayananda Sagar Academy of Technology and Management, VTU** — **Sep 2022 – Aug 2026**
  Bachelor of Engineering (B.E) - CGPA : 8.7

ADDITIONAL INFORMATION

- **Soft skills:** Communication, Leadership, Problem Solving, Creativity
- **Certifications:** Java 17 Masterclass , Data Structures and Algorithms, Web Development
- **Languages:** English, Hindi, Kannada, Telugu
- **Awards/Activities:** Participated in HackQuest, secured 1st place in inter-department python project exhibition, Hackathon Coordinator (2023)
