    e. Qa
    f. Stage
    g. prod

Java -jar aem-author-p4502.jar -r nosamplecontent
Java -jar aem-publish-p4502.jar

----------Technology Stack of AEM-----
1. OSGI (Open service Gateway Initiative)
2. Apache Sling
3. Java Content Repository

Framework = set of rules and some APIs

OSGI is a framework -> Apache Felix is the implementation of OSGi framework

Platform = is bigger than framework, platform can have multiple framework, multiple languages, many other things.

Granite is a general purpose platform -> language (Coral)

Homework
1. Read about CDN.
2. Read about Load balancers.
3. What is DDos attack?
4. Read about the Run modes from official documentation

   https://experienceleague.adobe.com/en/docs/experience-manager-65/content/implementing/deploying/configuring/configure-runmodes
5. Create a new page and do some authoring on that page and then publish that page. Create this page under we-
