Day-08 Notes

Wednesday, 5 November 2025 8:03 AM

Editable Templates continuation

Editable templates

1. Template console - Done
2. Template Editor - Done
3. Structure - Done
4. Initial Content - Done
5. Policies - Done
6. Layout - Done

In Editable templates, Template is a copy of Template type other than the name everything else is same.

Local properties vs Global properties

Local properties = Which comes via component dialog and they are accessible locally to that component node. These local properties can not be accessed anywhere else other than the component node.

Global properties = Policies (design properties)

Root layout container which is locked on the template

Inside root layout container we dragged another layout container and we called it inner layout container and then we unlocked it. As soon as you unlock it, this inner layout container will allow you to edit content on the page.

Locked = Structure = Editable only on Template but not on pages
Unlocked = Initial content = Able to be edited on pages

Session - 11 - Client Libraries

Client Libraries

1. Categories -> name of the client library
2. Embed -> it brings code of other client libraries to your client library
3. Dependencies ->
4. css.tx ->
5. js.txt ->
6. allowProxy ->

For a node to become a client library it should fulfill below things

1. Its primary type should be **cq:ClientLibraryFolder**.
2. It should have a property "**categories**". If a folder doesn't have this property it can not be client library.
3. It either should have a **css.txt** file or a **js.txt** file. Without any of these files this folder can not be a client library.

How to create a client library?

How to create a client library?

How to use client library?

1. Via code
2. Via configuration

Session - 12 Core Components

Homework

1. Create a client library and call this client library in to one of your component's html and then apply some styling via this clientlibrary on the your html.
2. Complete Exercise 5 from session 12 and create a new core component authoring example page.
