Day-16 Notes

Monday, 17 November 2025 8:51 AM

OSGI Services

Russia (This is not a service)
Harshitha
Srilakshmi
Jahnavi
Harshitha R
Leema
Devayanai
Precilla
Mehraj
Amritha

Ukraine (It is a service)
Shailee
Lakshmi
Pavithra
Ramya

Ukraine is the winner (It is a service)

OSGi Servlet or Sling Serlvet

First thing to remember -: For a class to be a servlet
1. It has to be an OSGi component
2. It has to be an OSGi Service
3. But it will implement Servlet Interface or in its Service attribute the value will be Servlet.class

---
Resource Based Servlet -> Are registered via combination of Resource and other things and little difficult to create.

Whenever we have to register a servlet via resource we need to provide below 4 things in combination
1. **Resource Type**
2. **Selector**
3. **Extension**
4. **Method type**

Flat number
Society name or apartment name
Area name
City name
Pin code
Country

Path based servlet -> Are registered via a dummy path and easir to create.

Whenever we have to register a servlet via path we just need to provide the dummy path

Indian parliament
Red fort
Bengaluru Vidhan Sudha

Safe servlets -> When you extend SlingSafeMethodServlet class to create your servlet then your servlet is called safe servlet

Non safe servlets -> When you extend SlingAllMethodServlet class to create your servlet then your servlet is non safer method servlet.

Session - 18 Logging and Debugging

Session - 18 Logging and Debugging

Homework

1. Write some servlets which are Get servlet and use your StrinManipulation Service into them and display some output on browser.
    a. Path based servlet
    b. Resource based servlet
2. On your learning project, in your home page hero component you have an input box. No take a text input from that box and then call the servlet and pass that text input into that servlet performa some String Manipulation on that text and send the data back on the browswer and either put an alert or display on the page.
