Day-17 Notes

Tuesday, 18 November 2025 8:50 AM

Running AEM in Debug mode Continuation of session 17

To Do the remote debugging in AEM we have to do below two steps

1. **Start your server in debug mode**
2. **Connect your IDE with the debugging session**

Once IDE is connected with AEM server's debugging session then you can start your remote debugging.

Command to start the AEM server in debug mode use below command

java -Xdebug -Xnoagent -Djava.compiler=NONE -Xrunjdwp:transport=dt_socket,server=y,suspend=n,address=30303 -XX:+HeapDumpOnOutOfMemoryError -Xmx1024m -Dorg.apache.sling.commons.log.level=INFO -jar aem-author-p4502.jar -p 4502 -verbose -nofork

---

Session - 19 User, Groups and Permissions and ACLs(Access Control List)

Old classic user admin interface -> http://localhost:4502/useradmin

Service User -

1. What is service user
2. How to create them
3. How to use them for various tasks

Session - 15 Cusomizing AEM UI

1. Overriding (**Sling Resource Merger**)
2. Overlaying

Resource we all know
Resolving a resource also we know

There is an object called **Resource**
There is also an object called **ResourceResolver**

/apps/hello/leema(5+2)

/libs/hello/leema(5)

hello/leema

Homework

1. Complete the self completing exercise from session 19 and create 3 users author, legal, editor
2. Please read this document for sling resource merger and book mark it. https://experienceleague.adobe.com/en/docs/experience-manager-65/content/implementing/developing/platform/sling-resource-merger
3. Complete all 4 exercises from Session 15.
