Day-19 Notes

Thursday, 20 November 2025 8:41 AM

Recap of previous session

1. Workflows
2. In homework we learned how to get ResourceResolver object in Sling Model.

Session - 21 Content Fragment & Experience Fragment

Content Fragment (CF)-:

Experience Fragment (XF) -:

Session - 22 Sling Schedulers and Listeners

Scheduler

OSGI config -> They are also used to author some content.

Till now we have seen various ways of authoring content

1. Component Dialog node (cq:dialog) which stores property locally.
2. Design dialog node (cq:design_dialog) which stores property globally as policies.
3. OSGi config -> This stores values at server level

Listeners - >

Quiz 6 link
https://shorturl.at/J2q8N

Multi Site Manager ->

Language master (Blue print)

Dispatcher

Query builder API or Search
Resource Resolver via service user
AEM as a cloud
Various open source Projects from which you can learn (ACS commons, Core component, Wknd guide)
AEM site optimizer
LLM Site optimizer

From where to read or learn something after the training.

Using JCR APIs you can save data to jcr.

Homework

1. Create an OSGi Serice and in that service have some OSIG config then provide the vallue from OSGI console. Read
